EDUCATION

BACHELOR OF COMPUTER SCIENCE

Concordia University, Montreal QC
September 2018 – December 2022

SKILLS

PHP, MySQL, HTML, CSS, JavaScript, jQuery, JSON, AJAX, Java,
Laravel, MAMP, Eclipse, Visual Studio Code, SVN, Redmine: Proficient
Vue.js: Intermediate

EXPERIENCE

FULL-STACK DEVELOPER

Centre for the Study of Learning and Performance (CSLP), Montreal QC
February 2023 – August 2025

- Deployed and maintained web applications using PHP, Laravel, MySQL, HTML, CSS, JavaScript, and Vue.js.
- Participated in the full software development cycle including planning, development, testing, and deployment.
- Collaborated with cross-functional teams including designers and QA testers.
- Used SmartSVN for version control and Redmine for bug/feature tracking.
- Ensured software compatibility with latest server environment (PHP, MySQL).

PROJECTS

LEARNING TOOLKIT+ (LTK+)

- This project aimed to support the development of literacy, numeracy, information literacy and self-regulated learning skills.
- Collaborated with the Senior Designer and Senior Developer to identify and implement effective solutions for both reported bugs and new feature requests.
- Maintained the project to ensure compatibility with the latest versions of PHP and MySQL.
- Uploaded test builds to the development (DEV) server via SSH for QA testing of bug fixes.
- Used Apache ANT to automate packaging and deploy builds to the production server, ensuring efficient and consistent update releases.

LTK+ RESOURCES

- The objective of this project was to provide teachers and parents with centralized access to high-quality teaching materials, guides, and printable resources that support the use of the LTK+ software.
- Collaborated with the Senior Designer to implement a new layout for the LTK+ Resources site using HTML, CSS, and jQuery.
- Used JSON to structure and store metadata for documents uploaded to the LTK+ Resources site.
- Uploaded and tested builds on the development (DEV) server via SSH as part of the QA cycle.

READSMANAGE

- The purpose of this project was to develop a web application to create and manage children's books, supporting literacy education through customizable digital content.
- Upgraded the Laravel version to ensure compatibility with the latest PHP version on the production server.
- Migrated the project from Vue 2 to Vue 3 to take advantage of its modern features and improved performance.
- Converted components from Options API to Composition API to enable better logic reuse and maintainability.
- Generated production builds using `npm run build` and deployed them to the server via SSH.

KEY ABILITIES

- Proficient in using Eclipse, Visual Studio Code, and MAMP to develop and test dynamic PHP-based web applications.
- Detail-oriented with strong analytical skills; able to work independently and collaboratively in team environments.
- Effective multitasker with solid problem-solving capabilities and a proactive approach to challenges.
